SUMMARY

Akhil Shibu is an MCA graduate from Kerala University (2026, CGPA: 8.48) with hands-on experience in data analysis, data cleaning, ETL pipelines, SQL, Python, Power BI, and Microsoft Excel. Skilled in extracting and processing data from PDF reports, performing exploratory data analysis (EDA), building interactive KPI dashboards, and validating data quality. Developed DataSentrix, a data analytics platform tested on a 200,000-row dataset. Also experienced in API testing and functional testing through internships. Seeking opportunities as a Data Analyst, Business Intelligence Analyst, Business Analyst, Power BI Developer, or SQL Analyst.

SKILLS

Analytics & Business Intelligence:
Power BI (Data Modeling, Star Schema, DAX Measures, KPI Dashboards, Drill-downs), Microsoft Excel (Pivot Tables, Power Query, VLOOKUP, XLOOKUP, Slicers, Dashboards), Data Visualization, KPI & Variance Analysis, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Storytelling, MIS & Business Reporting.

Programming & Databases:
Python (Pandas, NumPy, Matplotlib, Django), SQL (Joins, Aggregations, Subqueries, CTEs, Window Functions), ETL Pipelines, Schema Validation, PostgreSQL, MySQL, SQLite.

Business Analysis & Quality Assurance:
Requirements Gathering, Stakeholder Reporting, Root Cause Analysis, Manual & Functional Testing, REST API Testing, Defect Documentation, UAT, Data Quality Assurance.

Tools & Workflow:
Postman, Google Sheets, Git & GitHub, ECharts, Notion, MS PowerPoint, MS Word.

CERTIFICATES

Google AI Essentials: Coursera / Google

Prompt Engineering: Infosys Springboard

Participant, 24-Hour Hackathon: TKM College of Engineering

PROFESSIONAL EXPERIENCE

Quality Assurance Intern — 11/2025 – 12/2025

Kerala Sellers · Thiruvananthapuram, Kerala

- Performed manual and functional testing across buyer and seller modules of a hyperlocal e-commerce platform.
- Tested APIs using Postman and documented defects and test results using Excel, Word, and Google Sheets.

Python / Django Intern — 04/2025 – 05/2025

Digital Product Solutions · Thiruvananthapuram, Kerala

- Developed project Evalora, a project that converts handwritten text into digital text using a model accessed through an API.

EDUCATION

Master of Computer Applications (MCA) — 08/2024 – 10/2026

CHMM College for Advanced Studies, University of Kerala · **Overall CGPA: 8.48**

Bachelor of Computer Applications (BCA) — 11/2021 – 04/2024

CHMM College for Advanced Studies, University of Kerala · **Overall CGPA: 7.4**

PROJECTS

DataSentrix: Data Analytics Platform — 01/2026 – Present

Python, Django, PostgreSQL, Pandas, ECharts, Matplotlib, API, SQLite

- Built a web-based analytics platform with dataset uploads, data cleaning, KPI metrics, charts, and AI-assisted insights.
- Tested on a 200,000-row dataset with defined data quality rules (duplicates, missing values, outliers); verified accuracy via functional testing against an existing tool.

Road Accident Analytics (2020–2025) — 09/2026 – 10/2026

Python, SQL, Power BI, Microsoft Excel, Pandas

- Cleaned 6 years of Kerala Police district-wise accident data from PDFs into a 114-row dataset, resolving inconsistent district reporting and reconciling totals against source.
- Found accidents rose 79% (2020 to 2025) while deaths rose only 25%; top 5 districts account for 39% of accidents, and Palakkad has the highest fatality rate (12.3 per 100) despite ranking 6th in volume.
- Built an interactive Power BI dashboard (KPI cards, YoY trends, district map, drill-downs) to guide enforcement and awareness spending.

Bike Sales Analysis — 08/2026 – 09/2026

Microsoft Excel, Pivot Tables, Power Query, XLOOKUP, Slicers, KPI Cards

- Cleaned a Kaggle dataset and built Pivot Tables, charts, and an interactive Excel dashboard to analyse sales patterns.
- Found North America drives ~57% of income and Pacific ~22%; analysed how commute distance and education affect bike purchases.
